## Professional Summary

---

Computer Engineering student graduating in 2027 with hands-on experience in software and web application development, database management, and UI/UX design. Proficient in Python, JavaScript, SQL, HTML5, CSS3, MySQL, MongoDB, Git, and GitHub. Developed interactive web applications and a database-driven parking allocation system, and completed a UI/UX internship. Seeking a Graduate Trainee opportunity to apply programming, problem-solving, and software development skills while contributing to engineering projects.

## Education

---

**Bhagwant Institute of Technology, Barshi**  
Bachelor of Technology in Computer Engineering

2023–2027  
CGPA: 7.33/10

## Experience

---

**UI/UX Design Intern, Satyra IT LLP**

May 2026 – Aug 2026

- Designed responsive web interfaces and user-focused layouts, applying usability and visual consistency principles to project requirements.
- Created wireframes and interactive prototypes in Figma to define page structure, interface elements, and user flows before implementation.
- Collaborated with mentors to identify usability issues and refine interface layouts for clearer navigation and interaction.
- Applied responsive design principles to adapt web interfaces across desktop and mobile screen sizes.

## Projects

---

**AI Interview Coach**

*Python, HTML5, CSS3, JavaScript*

- Developed an AI-powered interview preparation platform using Python, HTML5, CSS3, and JavaScript for structured interview practice.
- Implemented an interactive interview workflow to guide users through interview practice and response interactions.
- Built a responsive front-end interface that supports consistent interaction across desktop and mobile screen sizes.
- **Live:** [interviewai-ulkr.onrender.com](https://interviewai-ulkr.onrender.com) — **GitHub:** [github.com/farhandev-20/InterviewAI](https://github.com/farhandev-20/InterviewAI)

**E-Commerce Website**

*HTML5, CSS3, JavaScript*

- Developed a responsive e-commerce web application using HTML5, CSS3, and JavaScript with product listing, category filtering, and shopping-cart functionality.
- Implemented category-based filtering and cart interactions to organize product discovery and purchasing workflows.
- Structured reusable front-end components to improve code organization and maintainability.
- Optimized layouts for desktop and mobile devices using responsive web design techniques.

**Smart Parking Slot Allocation System**

*MySQL, DBMS*

- Designed a MySQL-based parking management system covering vehicle registration, slot allocation, and parking-availability tracking.
- Created normalized database tables to organize parking records and support efficient data management.
- Implemented automated record handling for vehicle and parking-slot information, reducing reliance on manual record management.
- Applied DBMS concepts to structure data relationships and support parking allocation workflows.

## Technical Skills

---

- **Programming:** Python, JavaScript, SQL
- **Web Development:** HTML5, CSS3, Responsive Web Design
- **Databases:** MySQL, MongoDB, DBMS
- **Tools:** Git, GitHub, VS Code, Figma
- **Core Areas:** Software Development, Web Application Development, Database Management, Problem Solving, UI/UX Design

## Certifications

---

- IBM AI Fundamentals
- MERN Stack
- UI/UX Internship Certificate – Satyra IT LLP
- Python – Profound CRT

## Additional

---

- 2027 engineering batch candidate; available for joining from June 2027.
- Strong interest in software development, web technologies, databases, and continuous technical learning.
